U. S. Bureau of the Census, *Alphabetical Index of Occupations and Industries: 1950*
Washington, D. C., 1950

INTRODUCTION

The *Alphabetical Index of Occupations and Industries* is designed for use in classifying the occupation and industry returns from the Censuses and surveys conducted by the Population Division of the Bureau of the Census. The Index lists occupation and industry titles as they appear on the Census and survey schedules, together with a code indicating the appropriate occupation or industry category in which each title is to be classified. The occupation and industry titles shown here in alphabetical arrangement are presented according to the category in which each title belongs in a companion volume, the *Classified Index of Occupations and Industries*.

A new Index is prepared for each Decennial Census of Population and, in addition, intercensal editions are prepared when necessary. The current edition supersedes the 1948 edition which, in turn, followed the 1940 edition. The occupational and industrial classification systems used in this Index are revisions of the 1940 systems. Analyses of the relationship between the 1950 classifications and those used in earlier Censuses will be presented in the statistical reports of the 1950 Population Census.

The basic content of the 1950 Index, like that of other editions, is largely derived from previous editions. More immediately, the 1950 Index represents a revision and expansion of the 1948 Index, based primarily on the experience acquired during the Population Census pretests and sample population surveys conducted by the Bureau during the past few years. In addition, much valuable material was obtained from sources such as the *Dictionary of Occupational Titles* published by the United States Employment Service and the *Standard Industrial Classification* published by the Bureau of the Budget.

Many individuals and organizations, both private and public, were of assistance in the preparation of the Index. Their kind cooperation is gratefully acknowledged. Particular mention should be made of the assistance of Dr. Ernest J. McCormick, formerly of the Census Bureau and now with Purdue University, who, in his capacity as consultant, provided invaluable advice and guidance. Special acknowledgment is also due to the Joint Committee on Occupational Classification, sponsored by the American Statistical Association and the Bureau of the Budget, and to the Committee's chairman, Dr. Gladys L. Palmer of the University of Pennsylvania, for long-time, continuing cooperation in both the development of the Index and the establishment of the classification systems.

This Index was prepared in the Economic Statistics Section of the Population Division, by David L. Kaplan, Chief, Occupation and Industry Statistics Unit, Claire Casey, and Walter B. Pimm, with the assistance of Gladys M. Dodd, Inez B. Lange, and Hettie E. Owens.

ALPHABETICAL INDEX OF OCCUPATIONS AND INDUSTRIES

INSTRUCTIONS

General

The schedule item to be coded describes a person's job, and consists of three parts:
Occupation, that is, the kind of work the person was doing;
Industry, that is, the kind of business or industry he was working in;
Class of worker, that is, for whom he was working.

Since the three parts describe a single job, they are inter-related. In order to determine the proper code for one of the parts, it is sometimes necessary to refer to one or both of the other parts, as will be brought out in the instructions which follow.

Coverage.--This Index lists occupation and industry titles which have been reported in earlier Censuses and surveys conducted by the Population Division. You will sometimes find, however, that the title for which you are looking is not listed in the Index. There are two main reasons for this--(a) new occupations and industries are constantly being developed and (b) new titles for existing occupations and industries are always arising. If you cannot find the title for which you are looking, consult your supervisor.

Alphabetization.--The titles listed in the Index are arranged according to an alphabetizing system which is very simple, but yet is somewhat different from the usual system. The titles here are arranged in complete letter alphabetization. This is best illustrated by an example:

<u>In the Index</u>	<u>Usual system</u>
Abstract clerk	Abstract clerk
Abstracter	Abstract searcher
Abstract searcher	Abstract writer
Abstract writer	Abstracter
Acceptance man	Acceptance man

The reason for using complete letter alphabetization here is that certain titles are sometimes written as a single word, sometimes as two words. Under the usual system of alphabetizing, the position of such a title in the Index might vary according to whether the title was shown as a single word or as two words. Under the system used in the Index, the number of words does not determine the position of the title.

Cross-indexing.--A large proportion of the titles shown in the Index consist of two or more words. Certain of these multi-word titles are sometimes returned on the schedules in one order, sometimes in another. In a few cases, the multi-word titles are listed in the Index in all possible orders. Usually, however, these titles are listed only once in the Index. For occupation or industry titles consisting of two or more words, therefore, do not assume that the title has been omitted from the Index because the particular order of words reported on the schedule does not appear in the Index. You must look up all possible orders before consulting your supervisor. There is one exception to this rule, insofar as occupation is concerned. For 10 "key words," cross-indexing was eliminated entirely. This is explained below.

Occupation

The occupation title reported on the schedule is classified according to a system of 269 occupation categories, as shown on pages xv to xx of the Index. An occupation category consists of a homogeneous group of occupation titles and defines a particular field of work. Each category is identified by a 3-digit code. The 269 occupation categories are arranged into 11 major occupation groups. With two exceptions, the major groups are identified by a separate first digit in the 3-digit code, as follows:

<u>Code</u>	<u>Major occupation group</u>
0--	Professional, technical, and kindred workers
1--	Farmers and farm managers
2--	Managers, officials, and proprietors, except farm
3--	Clerical and kindred workers
4--	Sales workers
5--	Craftsmen, foremen, and kindred workers
6--	Operatives and kindred workers
700 to 720	Private household workers
730 to 790	Service workers, except private household
8--	Farm laborers and foremen
9--	Laborers, except farm and mine

Key words.--In order to save space, cross-indexing was completely eliminated for all occupation titles containing any one of 10 selected words which occur very frequently. Any occupation title containing one of these key words is listed only once in the Index--under the key word. For example, one of the key words is "Mechanic." If "Auto mechanic" appears on the schedule, look under "Mechanic, specified type" (on page 200) for "Auto"; you will not find "Auto mechanic," as such, listed. The list of key words is as follows:

Apprentice	Assistant	Helper	Manager	Repairman
Assembler	Engineer	Inspector	Mechanic	Teacher

Occupation not reported.--The code VVV is to be used for occupation when there is no occupation return on the schedule.

Industry

The industry title reported on the schedule is classified according to a system of 146 industry categories, as shown on pages xxi to xxiv of the Index. An industry category consists of a homogeneous group of industry titles and defines a particular industrial field. Each category is identified by a 3-digit code. The 146 industry categories are arranged into 12 major industry groups, as follows:

<u>Code</u>	<u>Major industry group</u>
1--	Agriculture, forestry, and fisheries
26 to 236	Mining
246	Construction
3-- and 4--	Manufacturing
5--	Transportation, communication, and other public utilities
6--	Wholesale and retail trade
7--	Finance, insurance, and real estate
806 to 817	Business and repair services
826 to 849	Personal services
856 to 859	Entertainment and recreation services
868 to 899	Professional and related services
9--	Public administration

Abbreviations.--The following abbreviations have been used to save space in listing industry titles:

- C - for such words as construction, building, excavating, etc.
- M - for such words as manufacturing, factory, mill, plant, etc.
- R - for such words as retailing, retail store, retail shop, etc.
- W - for such words as wholesaling, wholesale company, wholesale store, etc.
- X - for such words as mining, mine, well, quarry, etc.

These abbreviations are enclosed in parentheses and follow the industry title. They are to be considered part of the title. For example, on page 1, there is listed:

Acetylene gas (M).....469
Acetylene gas (W).....607

Schedule returns such as "Acetylene gas factory" and "Acetylene gas plant" are to be coded 469. On the other hand, schedule returns such as "Wholesale acetylene gas company" and "Acetylene gas wholesaling" are to be coded 607. A schedule return not covered by either listing is, of course, to be referred to your supervisor. Note that these abbreviations are also used with the industry titles shown in the center column of the occupation section of the Index. See, for example, "Assembler.....Boiler (M)" on page 11.

Industry listings.--One type of industry listing which needs explanation is illustrated by the last two industry titles on page 8. The title "Appraisers, except real estate" covers, of course, such schedule returns as "Jewelry appraisers" and "Automobile appraisers." Note, however, that the title "Appraisers, except real estate" also covers the schedule return "Appraisers." That is, the phrase "except _____" covers both certain specified returns and returns where no descriptive phrase has been entered.

Industry not reported.--The code WW is to be used for industry when there is no industry return on the schedule and the occupation section of the Index does not yield an industry code based on the occupation return.

Class of Worker

Class of worker is reported on the schedule in one of four categories:

- P - for private employer for wages, salary, commission, tips, etc.
- G - for government (Federal, State, city, county, etc.)
- O - in own business, farm, profession, trade, etc., for profits or fees
- NP - without pay on family farm or business

Class-of-worker codes.--The codes to be used are as follows:

P.....1
G.....2
O.....3
NP.....4

In addition to these four codes, there is a special code to be used for persons reported as "Armed forces" in occupation on the schedule. The occupation and industry codes for such persons are 595 916 (see page 10). The special class-of-worker code to be used in this instance is 5. Note that the instructions to enumerators called for a dash (-) as the class-of-worker return on the schedule for these persons.

Code Numbers

Each occupation category and each industry category, as explained earlier, is identified by a 3-digit code. The codes for occupation are different from the codes for industry. All codes beginning with "0" (from 000 to 099) refer to occupation. Codes beginning with other numbers refer to occupation when the code ends with number 0, 1, 2, 3, 4, or 5; when the code ends with 6, 7, 8, or 9, the code refers to industry. For example, codes 201, 584, and 631 are occupation codes, while codes 206, 588, and 637 are industry codes. There is just one exception to this rule; the code for the industry "Agriculture" is 105.

Arrangement of the Titles

The Index consists of two sections--occupation and industry. The two sections run side by side, separated by a heavy vertical line. The occupation section is on the left side, and the industry section on the right side. On certain pages, however, the occupation or industry section may be blank. This occurs when, for a particular combination of letters, there are many more occupation listings than industry listings, or vice versa. For example, there are no industry listings on pages 108 to 113. Similarly, there are no occupation listings on pages 57 and 58. Note that on each of these two pages, there are two industry sections. Since the occupation sections were blank here, an extra industry section was put in so as to keep the number of pages at a minimum.

As you will notice, the occupation section also includes industry titles. This is done wherever the occupation title cannot be coded independently from the accompanying industry title. The procedure by which this situation is worked out is explained in the next paragraph. The main reason for using industry as a guide in coding occupation is that the same occupation title sometimes means entirely different kinds of work in different industries. For example, an acid treater working in the oil fields belongs in the occupation category "Mine operatives and laborers." An acid treater in petroleum refining, on the other hand, belongs in the occupation category "Operatives and kindred workers (n.e.c.)."

How the Occupation Titles Are Listed

Because of the relationship explained in the preceding paragraph, the occupation titles appear in the Index in two basically different ways, alone or in combination with industry. The explanations which follow are shown with examples taken mainly from the first few pages of the Index, but each procedure being explained has general application.

When the occupation title appears alone.--There are three different ways in which the occupation title may appear alone:

- (a) The first way is:

Airplane captain.....002 556

An occupation return of "Airplane captain" on the schedule is coded 002 556 regardless of the accompanying industry return. It is, therefore, not necessary to refer to the industry section of the Index. Furthermore, this industry code is to be used even though the industry return has been omitted on the schedule. The reason for doing this is that "Airplane captain" occurs only in industries covered by code 556, that is, "Air transportation."

(b) The second way is:

Acetylene cutter.....685 Ind

An occupation return of "Acetylene cutter" on the schedule is coded 685. The accompanying industry return on the schedule is to be coded by reference to the industry section of the Index. If the industry return has been omitted on the schedule, the code VVV should be entered for industry.

(c) The third way is:

Accordion tuner.....572 Ind 817

Here, the procedure is the same as in (b) for "Acetylene cutter," except that when the industry return has been omitted on the schedule, the code 817 is to be entered for industry. The reason we assume code 817 to be acceptable is because "Accordion tuner," even though it occurs in a number of industries, is very highly concentrated in industry 817, that is, "Miscellaneous repair services."

When the occupation title appears in combination with industry.--Now we shall consider the procedure for coding occupation titles shown in the Index in combination with industry. There are three different ways in which such combinations may appear:

The occupation title may appear in combination with a specific industry entry; that is, the industry return on the schedule must be the same as the industry entry in the Index.

The occupation title may appear in combination with a star (*), which means that the industry return on the schedule must be covered by the industry category whose code is shown to the right of the occupation code.

The occupation title may appear in combination with a "term," which means that the industry return on the schedule must be included in one of the industry categories which, by definition, are covered by the particular term.

In all three cases, the occupation code given in the Index cannot be used for the occupation return unless the accompanying industry return on the schedule meets the specified condition. This is explained in further detail below.

(a) The first way is:

Activities director.....Welfare agency.....077 896

An occupation return of "Activities director" is coded 077 when the accompanying schedule return for industry is "Welfare agency." The industry code to be entered on the schedule in this instance is, of course, 896. If, however, the occupation return "Activities director" is not accompanied on the schedule by "Welfare agency" in industry, the code 077 is not to be used. In such a case, consult your supervisor.

(b) The second way is:

Acceptance man.....*.....545 377

An occupation return of "Acceptance man" is coded 545, if the accompanying industry return is one for which the industry code is 377. Any industry return coded 377 is acceptable here. Therefore, you will have to refer to the industry section of the Index to determine whether the industry return on the schedule is covered by code 377. If the industry return is not

covered by code 377, consult your supervisor. Sometimes, the occupation title is in combination with two or more industries, as for example:

Acid treater.....*	650 226
Acid treater.....*	690 476

This is very much like the "Acceptance man." If a return of "Acid treater" is accompanied by an industry return which would be coded 226, the occupation code is 650; if the industry return would be coded 476, the occupation code is 690. If the industry return is not covered by either 226 or 476, consult your supervisor.

(c) The third way is a variation of the situation just explained in (b). When the same occupation code is to be used for several industries, the alternative industries are often not listed separately. Instead, a single "term" is used to cover the various component industries, as for example:

Acidity tester.....	Dairy products.....	095 Ind
---------------------	---------------------	---------

The term "Dairy products" stands for all industry returns which would be coded 105, 407, 609, or 637. By using this term, we need only one Index listing, instead of four. If the industry return is not covered by the code 105, 407, 609, or 637, consult your supervisor. The following is a list of all the terms used in the center column of the occupation section of the Index, and the industry codes which each term covers:

Auto service.....	667, 668, 816
Dairy products.....	105, 407, 609, 637
Electric and gas utility.....	586, 587, 588
Jewelry and silverware.....	399, 646, 696, 817
Manufacturing.....	306-499
Metalworking.....	336-370, 506, 817
Mining.....	206-236
Optical goods.....	386, 387, 617, 698, 868
Photo processing.....	387, 459, 808, 849, 857
Pipe lines.....	567, 587, 588
Public administration.....	906, 916, 926, 936
Railroad cars.....	370, 506, 516, 568
Retail trade.....	636-699
Steel.....	336, 337, 346
Textile.....	436-446
Transportation.....	506-568
Wholesale trade.....	606-627
Woodworking.....	307, 308, 309

(d) There are a number of instances in the Index where an occupation title is listed in combination with one or more specific industry entries, and one or more stars, and one or more terms. Such listings are arranged in the following order--lines with stars are shown first, in numerical order of the industry codes; following are the lines with words (both specific industry entries and terms), arranged in alphabetical order. See, for example, the entries for "Agent" on page 3.

(e) Another type of entry you will find in the center column of the occupation section is "Any not listed above." This means that if the industry return on the schedule is not covered by any of the preceding lines in the Index, apply the occupation code listed on the "Any not listed above" line. In the case of "Agent" on page 3, for example, use the occupation code 300 when the industry return on the schedule is in category 116, 347, 459, or

any other category not covered by the preceding lines for "Agent." This also includes cases where industry is blank on the schedule; that is, a return of "Agent" with no industry return is to be coded 300. The industry code is VVV, in this instance. Sometimes, however, you will find a code to the right of "Ind" on one of these lines. In such a case, enter the specific code, rather than VVV, when industry is blank on the schedule. For example, see "Electrician's assistant" on page 12.

(f) One other kind of entry you will find in the center column of the occupation section is "Except _____. There are two examples on page 7. For "Apiculturist," there is a line "Except 105." The preceding line, of course, gives you the code for cases where the industry return is covered by code 105. Similarly, for "Appraiser" there is a line "Except U. S. Customs," immediately after a line "U. S. Customs." Note that the "Except _____" line also covers cases where industry has been left blank on the schedule (like the "Any not listed above" lines). Here, too, you will sometimes find a code to the right of "Ind" to use instead of VVV. In the two examples on page 7, "Apiculturist" does not have such a code, but "Appraiser" does.

Occupation-class-of-worker combinations.--The classification of some occupation returns depends on the accompanying class-of-worker return. This is so because, in certain cases, class of worker distinguishes between two different types of work. Where class of worker is used in determining the occupation code, the class-of-worker entry in the Index is underlined and shown to the left of the code. An example of this is:

Adjuster-arbitrator.....P 072 Ind

An occupation return of "Adjuster-arbitrator" is to be coded 072 if the accompanying class-of-worker return on the schedule is P. If the class-of-worker return is not P, however, consult your supervisor.

Special Notes

Meaning of "college".--The occupational classification system makes a basic distinction between teachers in college-level schools and teachers in other types of schools. In the Index listing of teachers, which begins on page 325, the word "college" has been used to cover all college-level schools. The following list shows the industry entries which are covered by the word "college":

Agricultural college	Junior college	State medical school
Architectural school	Law school	State normal school
Biblical institute	Medical college	State teachers' college
City college	Medical school	State university
City junior college	Normal school	Teachers' college
City normal school	Pharmacy school	Technological institute
City teachers' college	Polytechnic institute	Theological school
City university	State agricultural college	U. S. Coast Guard Academy
College	State agricultural extension work	U. S. Merchant Marine Academy
Dental school	State college	U. S. Military Academy
Divinity school	State extension work	U. S. Naval Academy
Engineering school	State junior college	University
Graduate school		Veterinary school
Institute of technology	State medical college	

Meaning of "farm".--The word "farm" sometimes appears in the center column of the occupation section of the Index. See, for example, "Manager.....Farm" on page 194. The word "farm," in these cases, covers the following industry entries:

Animal breeding	Kennels
Apiary	Lemon grove
Apple farm	Livestock farm
Aviary	Mink farm
Bee raising	Mushroom cellar
Berry farm	Mushroom raising
Bird raising	Nursery, plant
Broiler plant, poultry raising	Nursery, shrubs
Cattle farm	Nut farm, except tung
Cattle feeding farm	Orange grove
Cattle ranch	Orchard
Chicken farm	Ostrich farm
Chinchilla farm	Peach farm
Citrus fruit farm	Peanut farm
Citrus grove	Pecan farm
Cranberry bog	Peppermint farm
Dairy farm	Plantation
Deer, game farm	Potato farm
Dog breeding	Poultry farm
Dog kennels	Rabbit farm
Farm	Ranch
Farming	Rice canal
Florist, flower growing	Seed farm
Flower raising	Sheep farm
Fox farm	Shrubbery nursery
Fruit farm	State agricultural experimental farm
Fruit orchard	Stock farm
Fur farm	Sugar beet farm
Game farm	Sugar cane farm
Gardening	Tobacco farm
General farm	Tree nursery
Gladicola bulb farm	Truck farm
Greenhouse	U. S. agricultural experimental farm
Herb farm	U. S. agricultural experimental station
Hog farm	U. S. experimental farm
Hop farm	U. S. Indian farm
Horse farm	Vegetable garden
Hothouses	Vineyard
Hybrid corn growing	Yam growing

Permissible occupation-industry code combinations.--Certain occupation codes must not be combined with particular industry codes. Similarly, certain other occupation codes may be combined only with a few selected industry codes. These conditions are a basic part of the occupational classification system and must not be violated. If the occupation-industry return on the schedule is such that a forbidden code combination seems necessary, consult your supervisor. It should be noted that, in addition to "impossible" code combinations, there are, of course, many combinations which are highly unlikely and may, therefore, require consultation with your supervisor. A code combination of 645 869 ("Milliners" in "Hospitals")

would certainly require consultation. The following two lists present those occupation-industry code combinations which, by definition, are limited:

<u>Occupation code--</u>	<u>Must not be combined with industry codes--</u>
200.....	619, 679
290.....	826, 906-936
